PROFILE

Enthusiastic software developer with hands-on experience in Android application development, AI integration, and web technologies. Experienced in building real-world applications including AI-powered assistants and full-stack web projects. A quick learner with strong problem-solving skills, eager to apply technical knowledge and grow as a software professional.

PROJECTS

LUMI AI
An AI-powered floating voice assistant for Android

- Developed a floating AI voice assistant using overlay services that works above other apps, supporting text-to-text and voice-to-voice conversations.
- Built using Java in Android Studio, integrating Gemini AI and Speech Recognition for intelligent responses.

Guard Mine(IOT)
Mining Safely Helmet

- Built an IoT-based helmet using DHT11 and MAX30100 sensors to monitor miners' health and environment.
- Connected with the Blynk app for real-time data display and automatic alert notifications via buzzer and LED.

Ecommerce Website

- Built a demo e-commerce platform with product browsing and purchase features.
- Developed using HTML, CSS, JavaScript, PHP, and MySQL to showcase full-stack web development skills.

Student Leave Form

- Created a web-based leave management system using HTML, CSS, JavaScript, and Firebase.
- Enabled students to submit and track leave requests through a responsive and user-friendly interface.

DECLARATION

I hereby declare that the above given data are true and correct to the best of my knowledge and belief.
